Rajshahi, Bangladesh

PROFILE

Full-Stack Web Developer specializing in Next.js, TypeScript, and modern component architecture (MERN/T3 Stack). Proven ability to architect and deliver responsive, scalable, and secure full-stack solutions, including custom Admin Dashboards and data-intensive applications. Focused on efficient state management (Redux-Toolkit) and implementing best practices for performance and code quality.

TECHNICAL SKILLS

Frontend	NextJS, ReactJS, Typescript, Javascript, Redux-Toolkit, Zustand, TailwindCSS
Backend	NodeJS, ExpressJS, Fastify, Prisma(ORM), MongoDB
Tools & Libraries	Git & Github, Next-Auth, Zod, RESTful APIs, ShadCN, Docker

EXPERIENCE

Web Application Developer | WebBattalion 10/2024 – 06/2025

- Architected and delivered a full-stack Next.js Admin Dashboard with custom OAuth 2.0 authentication/authorization, streamlining administrative workflows and enhancing system security.
- Actively participated in a collaborative team environment, utilizing Git/Github for version control and enhancing skills in modern technical problem-solving.
- Developed key features for a complex Hospital Management App, focusing on seamless API integration and ensuring data reliability for critical patient records.

Freelance Web Developer (Remote) | Fiverr & Upwork 02/2024 – Present

- Successfully designed and deployed a Lead Generation Page for a client, integrating dynamic testimonials and focusing on conversion-optimized UI/UX to meet specific business goals.
- Managed personal practice projects using the MERN stack to apply and continuously improve architecture and secure deployment best practices.

PROJECTS

Acme Admin Dashboard | <https://nextjs-acme-dashboard-seven.vercel.app/>

- Engineered a scalable Next.js dashboard utilizing Server Components, partial rendering, and streaming to achieve optimal initial load and performance.
- Implemented robust search/pagination and server-side data mutation logic for efficient and reliable data management.
- Secured access using OAuth-based authentication (Next-Auth) and enforced role-based access control.

Movie App | <https://movie-app-three-pi-46.vercel.app/>

- Developed a dynamic application using React/JS and integrated it with external movie APIs for real-time data fetching (titles, ratings, and descriptions).
- Utilized Appwrite as the backend service, implementing user authentication, data storage, and state management.
- Translated a custom Figma UI/UX design into a visually appealing and fully responsive frontend, ensuring cross-device compatibility.

EDUCATION

Bachelor of Science, Physics, University of Rajshahi, Bangladesh 01/2019 – 10/2024 | CGPA: 2.80/4.00
